

NY-BEST MEMBERSHIP

*Plug into the Power
of Energy Storage*

Connect. Collaborate. Commercialize.

The New York Battery and Energy Storage Technology Consortium (NY-BEST) is a rapidly growing industry-led partnership of leading companies, entrepreneurs, and academic researchers building a world-class battery and energy storage sector based in New York State.

NY-BEST membership offers:

- Unmatched access to industry leaders, key researchers, partners & clients
 - Improved ability to compete for external funding and notification of federal, state and other funding opportunities
 - Assistance with locating testing, characterization and validation capabilities
-

NY-BEST members are converting energy storage solutions from idea to commercialization.

NY-BEST MEMBER ON NY-BEST MEMBERSHIP

NY-BEST is a great vehicle for bringing together the best of NY talent and technology to build energy storage solutions for the future.

NY-BEST has helped GE build critical alliances for advancing our sodium metal halide battery technology and has helped foster connections with potential customers.

Glen Merfeld, GE Global Research

NY-BEST MEMBER ON NY-BEST MEMBERSHIP

States fight for resources and prestige. New York is home to world-class universities and research institutes as well as innovative companies both large and small whose core capabilities together encompass all elements necessary to lead advancements in energy and storage technologies.

NY-BEST facilitates cooperation between these entities, empowering New York to become the nation's cleantech epicenter.

Ellen Gooch, Director of Marketing, Sendyne Corp.

The logo for Sendyne, featuring the word "Sendyne" in a bold, sans-serif font. The "Sendyne" part is in black, and the "dyne" part is in a vibrant green color. A small trademark symbol (TM) is located at the top right of the green portion.

Connect. Collaborate. Commercialize.

Energy storage is critical to the adoption of smart grid and electric transportation technologies.

NY-BEST MEMBER ON NY-BEST MEMBERSHIP

We have found involvement in NY-BEST to be a very efficient way to become aware of and develop fruitful connections with a wide variety of companies with energy storage capability in NY State.

*Dr. Mark Mathias
General Motors R&D Director,
Electrochemical Energy Research Lab
Honeoye Falls, NY*

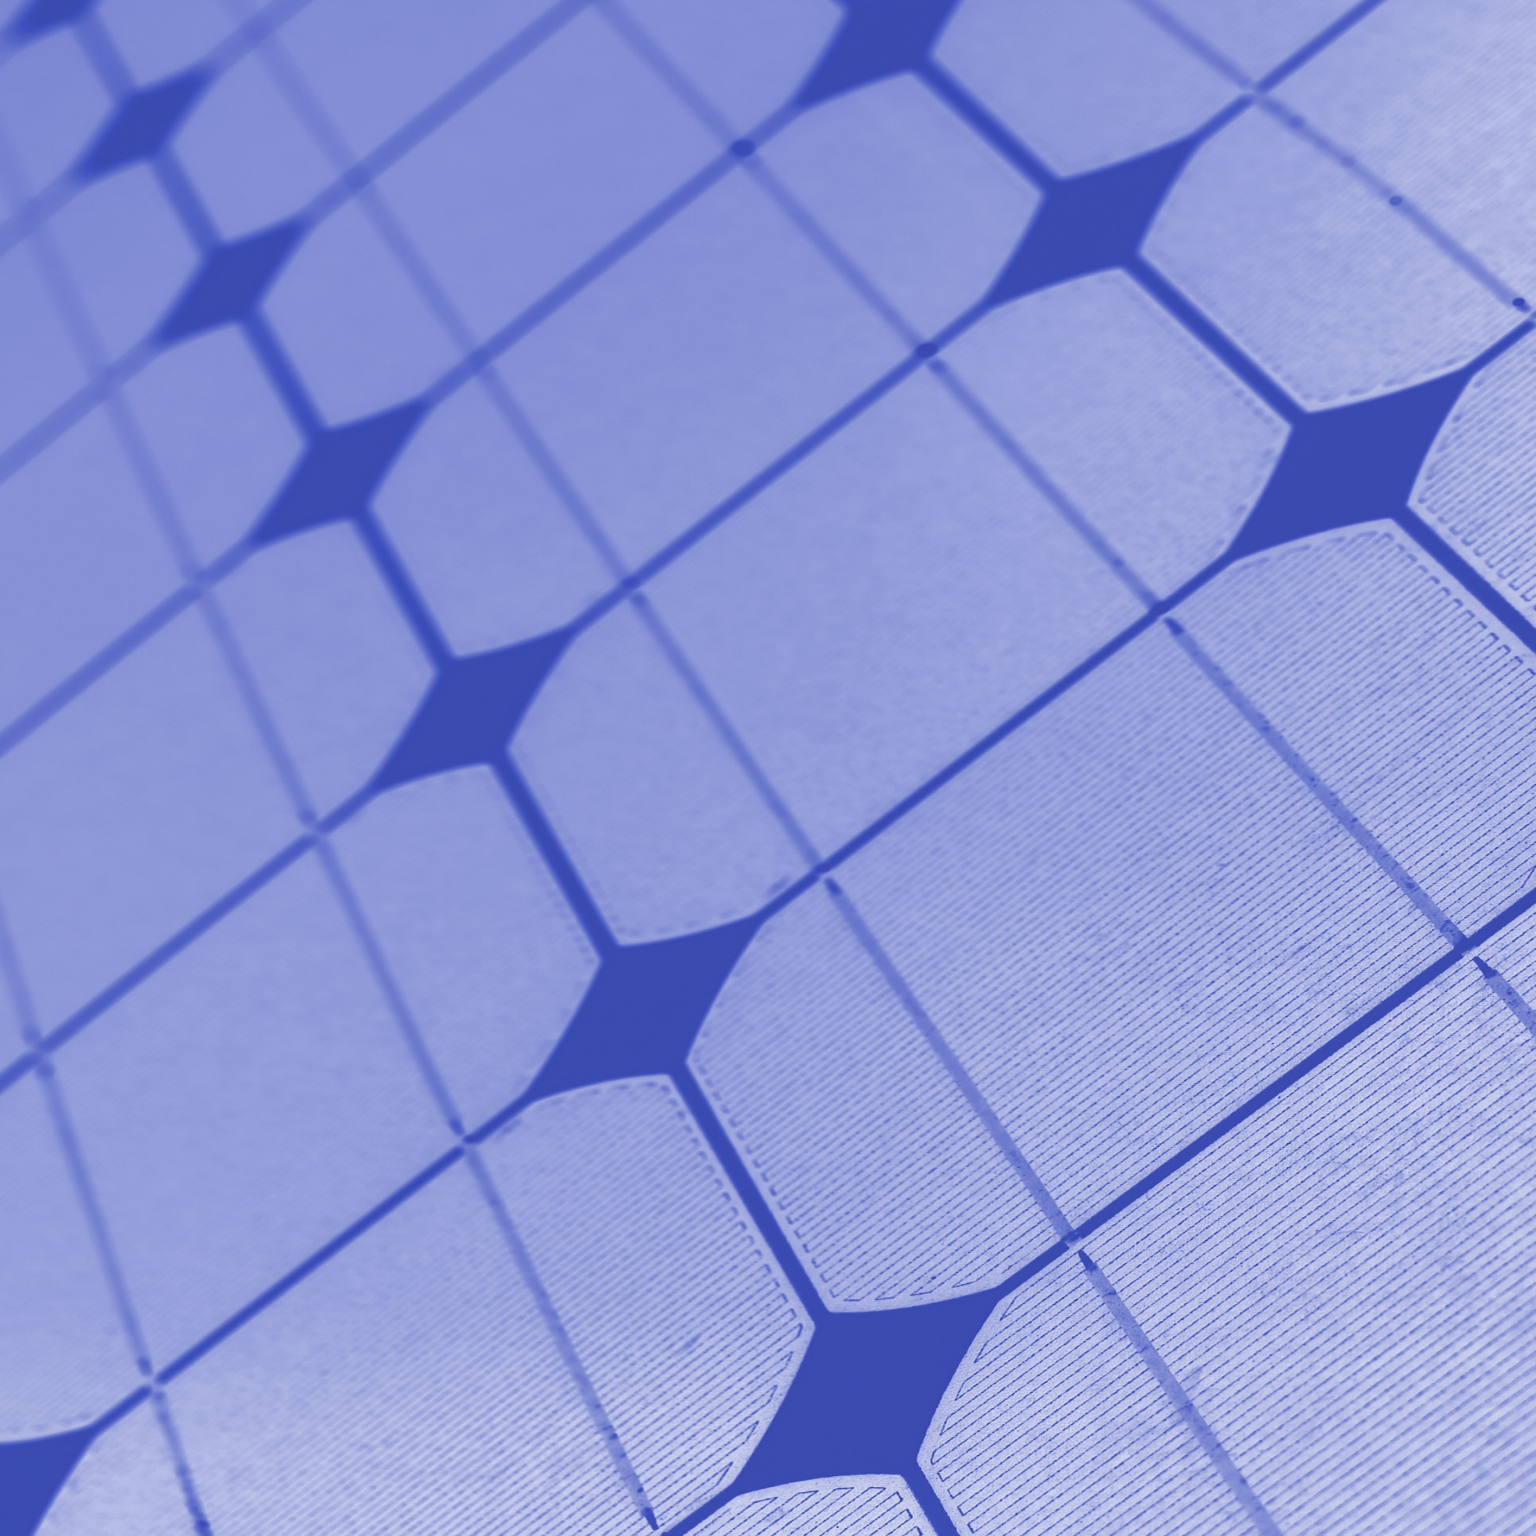

NY-BEST MEMBER ON NY-BEST MEMBERSHIP

The NY-BEST interaction has allowed us to identify contacts for resources to advance our project. This will enable us to more rapidly test materials, develop a robust data set and provide credible assessment of the technology for future partners.

Bob Curtis, VP Operations, Cerion Enterprises

NY-BEST members represent storage expertise from R&D to engineering and manufacturing.

NY-BEST MEMBER on NY-BEST MEMBERSHIP

The consortium provides a unique opportunity to charter a vision for the future in this key sector of the energy challenge.

*James A. Misewich, Ph.D.,
Associate Laboratory Director for Basic Energy Sciences
at Brookhaven National Laboratory*

The NY-BEST Consortium provides members with critical resources for the development and testing of advanced energy storage technologies.
